

• LIVE ON THE CALL

The real-time copilot for cold calls.

Parley listens to both sides of a live sales call and whispers the perfect next line to the rep — in under a second, on any dialer. Every rep sells like your best rep.

Real-time, not post-call

B2B SaaS • per-seat

Sales / SDR teams

THE PROBLEM

Cold calls aren't lost in the pitch. They're lost in **the pause**.

The moment a prospect pushes back, the rep freezes. Three seconds of dead air, a weak "thanks for your time," and the deal is gone. Every sales org fights the same four problems:

Reps freeze

The average rep fumbles the objection they've heard 1,000 times. Talent doesn't transfer through a script deck.

Ramp is brutal

New reps take ~2–3 months to get productive. Most churn before they do. That's pure burned payroll.

Coaching doesn't scale

Managers hear ~2% of calls. Feedback lands days later, after the same mistake is made 100 more times.

Tools grade too late

Gong-style analytics tell you why you lost — after the call is over and the deal is dead.

Inside sales runs on volume × conversion. Both break at exactly the moment help is impossible to deliver: mid-call.

THE SOLUTION

A copilot that's **in the call.**

Parley hears both sides of the live call, reads the moment, and puts the exact rebuttal or next line on a discreet overlay only the rep can see — in under a second.

- 01 Hears both sides — over any dialer, invisible to the prospect
- 02 Detects the stage & objection the instant it lands
- 03 Whispers the winning line — trained on your best reps

One loop. Under a second. Every call.

No bot on the line, no new dialer, no rip-and-replace. Parley rides along and delivers the moment that decides the call.

01 · CAPTURE

Hears both sides

Rep + prospect audio, streamed to real-time transcription over any softphone.

02 · UNDERSTAND

Reads the moment

Tracks the call stage and classifies the objection the instant it lands.

03 · WHISPER

Hands over the line

The right rebuttal or next step, rendered to the rep's overlay. One tap logs what worked.

Any dialer / softphone

CRM sync — FollowUpBoss · kvCORE · HubSpot

TCPA / DNC built in

Call scoring on 100% of calls

Sub-second in-call AI just became possible.

The three things real-time coaching needed all crossed the line in the last 24 months.

Fast, cheap STT

Streaming speech-to-text (Deepgram-class) now transcribes both sides live for pennies — the input layer is finally real-time.

LLMs at latency

Modern models classify an objection and retrieve the right line in <1s — fast enough to matter mid-sentence, not next week.

Sales went remote

Reps dial from softphones on laptops. The overlay has a screen to live on — and managers can't walk the floor anymore.

THE WEDGE

Incumbents (Gong, Chorus) were built pre-latency — architected for **post-call**. Real-time is a new category, not a feature they can bolt on.

MARKET

A big, funded, growing wedge.

Revenue intelligence and sales-enablement software is already a multi-billion-dollar category (Gong last valued at ~\$7.25B). We enter through the underserved, high-volume outbound segment and expand across the floor.

TAM **\$30B+** — global sales tech & conversation intelligence

SAM **\$8B** — ~10M inside-sales / SDR seats × real-time coaching

SOM **\$400M** — beachhead: high-volume outbound in NA

Bottom-up: 1M seats × ~\$70/rep/mo ≈ \$840M ARR at the SAM edge. Illustrative — refine with your data.

WHY WE WIN

Real-time, SDR-first, live in minutes.

	PARLEY	GONG / CHORUS	BALTO / CRESTA	STATIC BATTLECARDS
Helps during the live call	✓	—	✓	—
Real-time objection rebuttals	✓	—	partial	—
Works over any dialer, live in minutes	✓	varies	heavy rollout	✓

Per-seat, self-serve pricing	✓	enterprise	enterprise	✓

MOAT

A rebuttal library that compounds with every logged call — the more your team dials, the sharper Parley gets. Data network effect per customer.

BUSINESS MODEL

Per-seat SaaS. Land a pod, expand the floor.

Self-serve entry, sales-assisted expansion. Priced per rep with transparent usage — one saved deal covers a rep's year.

STARTER

\$39/rep/mo

Solo closers & small pods. Overlay + rebuttals.
Self-serve.

CAC (PLG-led)

120%+

target net revenue retention

Land → expand

pod → team → floor

Illustrative unit economics — replace with your live metrics.

Early signal from teams who live on the phone.

2 wks

ramp, down from ~2 months

+34%

objection→conversation rate

100%

of calls scored, not sampled

<1s

objection → on-screen line

Beachhead motion

PLG free tier → in-call “aha” on the first dial → pod converts → sales-assisted expansion to the floor. Real-estate ISAs (kvCORE/FollowUpBoss) + SDR teams first.

Distribution

Objection-library & “real-time vs post-call” content engine, dialer/CRM marketplaces, and a shareable in-product Objection Arcade as a top-of-funnel loop.

Metrics from early pilots – replace with your current logos, ARR, and pipeline before sending.

Path to \$10M ARR.

Seat-based, expansion-led. Illustrative ramp — replace with your model.

- Land pods self-serve; expand to floors with a small sales team
- NRR >120% carries the curve as seats-per-account grow
- Gross margin scales toward ~85% as STT/inference cost drops

TEAM

Built by people who've shipped real-time & sold hard.

[Founder / CEO]

GTM & sales

[Prior: scaled an SDR org / sold into sales teams. Add 1-line credibility.]

[Founder / CTO]

Real-time & ML

[Prior: low-latency audio / speech / infra at a notable company. Add credibility.]

[Founding eng / advisor]

Product

[Key hire or advisor with domain weight. Add credibility.]

Placeholder – drop in real names, photos, and one credibility line each. This is the slide investors read first.

Raising \$3M seed.

To turn early in-call “wow” into a repeatable, expanding motion — and own the real-time category before the incumbents wake up.

40% · Product

Latency, accuracy, the rebuttal-training loop, dialer/CRM breadth, compliance depth.

40% · GTM

Founding AEs, the content/PLG engine, and dialer-marketplace distribution.

20% · Team

Speech/ML and product-eng hires to hold the real-time edge.

18-MONTH MILESTONES

\$1M+ ARR · 120%+ NRR · repeatable pod→floor expansion · category-defining brand in real-time coaching.

Every rep sounds like your **best rep.** Live.

Win the call while they're still on the line.
